

ANANTHU S

Calicut, Kerala — +91 9400642545
ananthus@gmail.com — LinkedIn — GitHub

PROFESSIONAL SUMMARY

Software Developer and engineering undergraduate specializing in building practical systems across Internet of Things (IoT), embedded programming, and application development. Developed real-world projects including an ML-powered Android application for behavioral analysis. Focused on solving complex problems through system integration, with a proven ability to quickly learn and adapt to new technologies.

TECHNICAL SKILLS

Languages: Python, Kotlin, Java, C, Embedded C
Technologies: Android Studio, Arduino, Kivy, Linux, Git, GitHub, IoT
Core Concepts: Data Structures & Algorithms, Object-Oriented Programming (OOP), Machine Learning (ML), Computer Networks, Internet of Things (IoT)
Databases: SQL, SQLite

PROFESSIONAL EXPERIENCE

Developer Intern – CogniLearn (JHF IT Innovations) June 2026

- Gained hands-on exposure to real industry environments and professional software development workflows.
- Familiarized with industry-standard tools and trending technologies in the IT sector.

Machine Learning Intern – Yhills Sep 2024 – Nov 2024

- Built and evaluated Machine Learning (ML) models using Python for predictive analytics.
- Performed data preprocessing, feature selection, and hyperparameter tuning to optimize model performance.

Python Automation Intern – Propulsion System May 2023

- Developed Python scripts to automate system workflows and data processing tasks.
- Reduced manual effort by streamlining repetitive operational processes.

PROJECTS

Digital Behaviors – ML-Based Android Application 2026

- Developed and deployed an Android application using **Kotlin** to analyze smartphone usage patterns.
- Implemented a **Random Forest model** achieving ~98% **accuracy** in digital addiction prediction.
- Designed a real-time data collection system tracking screen time, app usage, and unlock frequency.
- Built a secure sandbox environment with PIN-based authentication for controlled testing.
- **GitHub:** [View Code](#)

Smart Waste Bin – IoT-Based Waste Segregation System 2025

- Engineered an automated waste classification system using **Embedded C and Arduino**.
- Integrated hardware sensors to detect and categorize waste types in real time.
- Designed control logic for automated segregation, significantly reducing manual sorting effort.
- **GitHub:** [View Code](#)

E-KART – Smart Store Management Application 2024

- Developed a cross-platform mobile application using **Python (Kivy)** for inventory and store management.
- Implemented personalized product recommendation algorithms based on user interaction patterns.
- Enabled real-time comparison of product availability and pricing across nearby retail stores.
- **GitHub:** [View Code](#)

EDUCATION

B.Tech in Computer Science and Engineering , KMCT College of Engineering	2027 CGPA: 7.57
Diploma in Computer Hardware Engineering , KMCT Polytechnic College	2024 CGPA: 8.52
Diploma in Computer Application , SCOPE Kerala	2023

LEADERSHIP & ACTIVITIES

Technology Lead – IEDC, KMCT College of Engineering

- Led technical initiatives and guided student teams in developing and deploying project prototypes.
- Participated in the IEDC Summit, engaging in startup and innovation ecosystem discussions (2025 & 2026).
- Active hackathon participant – Community Digital Learning Space (2025).

CERTIFICATIONS

- Ethical Hacking – Cisco Networking Academy
- Generative AI (Gen-AI) – NIT Calicut
- Hacker Toolkit – Offenso Hackers Academy
